## PROFESSIONAL SUMMARY

Computer Science Engineering graduate with 1.5+ years of professional experience in software development and additional hands-on cybersecurity training and internship experience. Skilled in Java, Python, PHP, C++, JavaScript, SQL, web development, application support, database-related development, secure coding, vulnerability assessment, penetration testing, and application security. Experienced in developing, maintaining, and improving software applications and web applications, integrating APIs, performing security assessments, and documenting technical findings. Strong analytical, problem-solving, communication, teamwork, and adaptability skills. Seeking opportunities in software development, IT, application support, technical support, IT analysis, cybersecurity, and related IT roles.

---

## TECHNICAL SKILL

- Programming Languages: Java, Python, PHP, C++, JavaScript, SQL
- Web Technologies: HTML, CSS, JavaScript, PHP, WordPress, Web Applications, Responsive Web Design
- Software Development: Software Development, Application Development, Application Maintenance, API Integration, Database Management, Secure Coding, Git, Version Control, Agile Methodologies
- Cybersecurity: Cybersecurity, Vulnerability Assessment, Penetration Testing, VAPT, Application Security, Secure Coding, System Hardening, Security Configuration Review, OWASP Top 10
- Security Tools: Nmap, Wireshark, Netcat, Metasploit, Burp Suite, Frida, Genymotion
- Operating Systems: Windows, Linux
- Professional Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Technical Documentation

---

## EDUCATION

- B.E. COMPUTER SCIENCE ENGINEERING: DMI Engineering College, Kanyakumari(2020)
- CYBER SECURITY ANALYST COURSE: ICT Academy of Kerala, Thiruvananthapuram(2024)

## PROFESSIONAL EXPERIENCE

**Software Developer**

Mahatma Gandhi University, Kottayam
June 2022 – November 2023

- ·Developed and maintained software applications using Java, Python, and PHP.
- ·Improved application functionality, performance, reliability, and usability.
- ·Optimized university portals and digital workflows, contributing to a 75% reduction in paperwork.
- ·Improved application security by approximately 30% through code reviews and implementation of security features.
- ·Integrated payment gateway APIs to enhance application functionality and user experience.
- ·Developed responsive web interfaces using HTML, CSS, and JavaScript.
- ·Worked with web applications and databases for application development and maintenance.
- ·Supported application improvements, troubleshooting, testing, and ongoing maintenance activities.

**Cybersecurity Intern**

Active Bytes, Thiruvananthapuram
November 2024 – December 2024

- ·Conducted secure configuration reviews for Cisco and Windows environments based on CIS Benchmarks.
- ·Prepared security assessment reports documenting configuration findings and observations.
- ·Performed Android application Vulnerability Assessment and Penetration Testing (VAPT).
- ·Conducted static and dynamic application security analysis.
- ·Identified vulnerabilities related to the OWASP Top 10.
- ·Used Burp Suite, Frida, and Genymotion for Android application security testing.
- ·Documented security findings and recommended remediation strategies.
- ·Gained practical experience in vulnerability assessment, penetration testing, application security, and security reporting.

## CERTIFICATIONS AND TRAINING

- ·Certified Cybersecurity Analyst
- ·Cloud Computing: Core Concepts
- ·Wireless Networking Essential Training
- ·Cyber Security Analyst Course – ICT Academy of Kerala

## PROJECTS

**Web Application Security Enhancement**

- ·Developed custom ModSecurity rules to detect and block SQL Injection and Cross-Site Scripting (XSS) attacks.
- ·Applied web application security concepts to improve application protection.

**Android Application Security Testing**

- ·Conducted vulnerability assessments of Android applications using static and dynamic analysis.
- ·Used Burp Suite, Frida, and Genymotion for security testing.
- ·Documented vulnerabilities and recommended remediation strategies.

**Vulnerability Assessment And Penetration Testing**

- ·Conducted vulnerability assessments and penetration testing activities.
- ·Identified security risks and documented findings with actionable remediation strategies.
- Gained practical exposure to security testing and bug bounty activities.

**CNN-based Diabetes Disease Prediction**

- ·Designed and implemented a predictive model for diabetes detection using healthcare-related datasets.
- ·Applied machine learning concepts to develop a predictive solution.
